

ENHANCE

your image

Distinctive. Upscale. Stylish.

Thermo-Glaze premium insulated cups will help communicate your upscale image with each beverage served. The powerful combination of your distinctive logo printed on Thermo-Glaze cups reminds customers of the quality, value, and satisfaction gained from each visit.

It's no wonder you routinely see Dart Thermo-Glaze in the nation's most visible dining establishments and other quality quick-serve operations.

INCREASE your profits

Portion control is your key to profitability.

The capacity of Thermo-Glaze cups is based upon their flush fill beverage volume. This means that with Thermo-Glaze you'll better control beverage costs, making your beverage program more profitable.

SATISFY your customers

Most coffee drinkers will tell you they like their coffee steaming hot. What they don't like is burning their hands.

External Cup Temperature

When beverage temperature measures 190°F

Dart Thermo-Glaze is all you need 136°

Paper Hot Cup with Jacket 153°

Extruded Foam Cup 155°

Double Paper Hot Cup 161°

"Blistered" Paper Hot Cup 164°

Single Paper Hot Cup 180°

Unlike paper hot cups, Thermo-Glaze cups remain comfortable to the touch, no matter how hot the beverage. No need for wraps, jackets, extra napkins, or double cupping.

What's more, Thermo-Glaze cups have no effect on beverage taste. Studies prove it. An independent food and beverage laboratory,* along with a panel of coffee experts, concluded Dart Thermo-Glaze cups "do not affect the flavor components of coffee."

ASSURE

quality performance

Why does Thermo-Glaze outperform other cups? It starts with superior product design.

Heavy duty, single-piece construction means no leaking seams. The flared rim styling projects an upscale image, and the smooth, glossy surface maximizes the presentation of custom printing.

STREAMLINE your operation

Five cup sizes, one lid. Hot or Cold.

From 12 ounce through 24 ounce, Thermo-Glaze cups accommodate the most popular drink sizes while all accepting the same lid size. In addition to reducing customer and employee confusion, fewer lids need to be inventoried.

COMPLEMENT

with quality

You won't find a larger assortment of lid styles anywhere.

Top off Thermo-Glaze cups with any of a variety of quality lids, from purely functional styles to those designed for specialty applications.

Our Optima[®] lid combines convenience with security to create a lid that is truly unique. Optima is designed to completely seal when closed, and has an easy opening tab that locks securely out of the way when ready to drink. But, unlike other lids, Optima can be opened and reclosed again and again.

Our Cappuccino lid was specifically created to satisfy gourmet coffee drinkers. The upscale, domed design accommodates toppings. The elevated oval opening allows for easy sipping on the go.

Don't forget our **Sip Thru**[®] lid, one of the most popular travel lids anywhere. No tearing, no dripping... just sipping.

KNOW the facts

About Foam Foodservice Products And The Environment

- Foam foodservice products do not "clog" landfills. Polystyrene foam foodservice products constitute less than 1%, by both weight and volume, of landfill waste.
- Dart does not use chlorofluorocarbons (CFCs) in manufacturing foam cups, and never has.
- An average weight foam cup requires 32% less energy to produce than a comparable paper hot drink cup with cardboard sleeve.
- Plastic coated paper cups are difficult to recycle due to their multi-layer composition.
- An average-weight paper hot cup generates about 181% more solid waste by weight than a comparable foam cup.
- An average-weight paper hot cup with a cardboard sleeve requires about 47% more energy to produce than a comparable foam cup.
- An average-weight paper hot cup with a cardboard sleeve generates 379% more solid waste by weight than a comparable foam cup.
- An average-weight paper cold cup generates 148% more solid waste by weight than a comparable foam cup.
- Polystyrene foam recycling facilities are accessible to the public at Dart's US, Canada, Mexico, Argentina and United Kingdom manufacturing plants, and in partnership with various municipalities.

Visit www.dart.biz/recycle to learn more about foam recycling.
